

RENEWABLE ENERGY

NEW YORK HOSPITAL QUEENS is the recipient of a grant from NYC to install a solar thermal energy system on our existing campus.

GREEN ROOF

MONTEFIORE

GREEN ROOFS are stable, living ecosystems that provide many environmental, aesthetic, and financial benefits, including:

- Reducing heating and cooling costs
- Controlling stormwater runoff and erosion
- Filtering water and air pollutants
- Reducing sound reflection and transmission
- Increasing aesthetic appeal
- Doubling the life of the roof, reducing costs and landfill

PlaNYC

 **planyc**
A GREENER, GREATER NEW YORK

PlaNYC is Mayor Bloomberg's plan for a **SUSTAINABLE NEW YORK CITY.**

New York
Hospital
Queens
has signed
on to the
Mayor's
"Healthcare
Challenge".

We have pledged to
**REDUCE GREENHOUSE GAS
EMISSIONS BY 30% BY THE YEAR 2018.**

As of December 2010, we had attained a
14% reduction toward the 30% goal.
